THE REDCLIFF REVIEW

THURSDAY, AUG. 25th, 1938

Number 11

Regular Meeting of Town Council Monday Evening

Request For Building to Have State Credit House

Town Council met last Monday evening and the Mayor and all Councillors were present.

Mr. H. Leppard was of the meeting and requested for improvements on the building which he rents from the town Council decided that town employees make the improvements on the building.

Town Municipal Trustee requested for \$200.00 as amount for the school business. Council passed motion for the amount.

Councillor Willis was appointed as deputy Mayor for the next three months.

Council made arrangements to make hall, and advertising was instructed to be made.

C. P. R. put in account of \$17 for making improvements on the spur tracks of the several industry districts in town.

Town accounts were approved by finance committee and motion was passed for payment.

Application for work at the town Tax rate for this year was passed and it was at the same rate as last year.

Social Service Tax of the town was also passed.

A bylaw of the Town for the collection, removal and disposal of garbage, etc., and fixing rates chargeable, was passed in bylaw after three readings.

Councillor Willis stated that two provincial officials were in town last Saturday to make arrangements for securing a town building to be used for a branch of Provincial Treasurer and State Credit House. The officials were willing to secure the building on Third St. just south of Gust's store. Council was willing for them to secure the building at \$10.00 per month and make the necessary improvements.

Between 2,600 and 2,700 horses in Saskatchewan died in the recent encephalomyelitis epidemic. Reports are that several horses in this district also succumbed to this unmentionable disease.

Mr. Art. Wray of Edmonton, spent the week end here with his father, Dr. Wray. Dr. Wray left on Monday with his son by motor for Coups and other points south. Upon their return they will make a short visit in Calgary at Dr. Wray's home.

The Lethbridge Herald of Wednesday contained a good picture of our new swimming pool. Jimmy Mackenzie's smiling countenance is recognized in the foreground.

A fine new paint sign has been put on H. Van Wier's store. It is a fine sign.

Free Cooking Course By Woman's Bureau

Was Held in Gordon Memorial Friday and Saturday

Quite a number of ladies were in attendance both Friday and Saturday afternoon in Gordon Memorial to attend the free cooking course given by the Women's Bureau. The course was given by Miss McCaig, a teacher at the Olds Agricultural School. She is at this time giving free courses in her work at different points throughout the province.

The ladies who attended the course were well repaid for their trouble. The information given was very helpful and will be of lasting value to the recipients.

At the close of the meeting on Saturday Mrs. A. R. Ballantyne, Secretary of the local branch of the Red Cross, under whose auspices the courses were given, expressed the thanks of those in attendance to Miss McCaig and Mrs. Sellars presented her with a beautiful bouquet of gladioli.

Advertising and Progress

Advertising has proven itself to be the largest of progress. It has not been long since business advertising was severely criticized and ridiculed as showing of personal qualifications. At the same time there was a little faith in the claims of advertisements as in the claims of the bazaar. Only the quick and the impetuous, who had everything to gain and nothing to lose, then resorted to advertising.

Business is ever the standard bearer and apostle of progress, and so it was business which discovered that advertising was a vital factor in all growth. When advertising was admitted to the fireside of business it was not the big business of today. Big business traces its beginning to the employment of advertising.

In its conversion to advertising business was soon following by industry, commerce and professions. The benefits of advertising has made itself manifest in each step forward.

That was the evolution of advertising, until today advertising plays a part in every phase of life and is the working instrument of all except the doctor and the lawyer, who still consider it "unethical" to advertise for business. He may place his card in the newspaper, but it is professionally forbidden for the doctor or the lawyer to inform the public of his capabilities.

Nothing in life has attained perfection and evolution as an eternal, ever-changing, advancing, overhauling advancement. The evolution of advertising will not stop with its adoption by medicine and jurisprudence, but that adoption will establish another milestone of progress.

NOTICE

Re Collection of Garbage Etc.

On and after the 1st of September 1938 the town of Redcliff will provide for the removal, collection and disposal of garbage, refuse and ashes and will undertake the cleaning and emptying of outside toilet privies (excluding pits).

The rates are as follows and are payable in advance subject to a discount of 10% if paid on or before the 10th of the month, in the same manner as water rates.

For the collection, removal and disposal of garbage, refuse and ashes from dwellings and places (excluding Hotels, Restaurants, Cafes and Stores) per month the sum of 20 cents.

For the collection, removal and disposal of garbage, refuse and ashes from Hotels, Restaurants, Cafes and Stores per month the sum of 50 cents.

For the removal and disposal of the contents of any outside toilet or privy (excluding pits) per month the sum of 50 cents.

Except in the cases of Hotels, Restaurants, Cafes and Stores the above rate for cleaning outdoor toilets shall also cover the charge for garbage.

Collection of the garbage and cleaning of the toilets will be done twice a month during the Summer months and once a month during the Winter months.

Town of Redcliff

Secy-Treas.

New Vacancies For Royal Canadian Air

Selections Will be Made Shortly For Training Nov. 1st.

The following information may be of interest to local young men who are thinking of aviation. The Royal Canadian Air Force has vacancies for a number of Permanent Commissioned Officers and selections will be made shortly so that training may be commenced on Nov. 1st, 1938.

Any young men who fulfil the conditions and wish to apply.

Mr. Strange Opinion of The World Wheat

He Asks If These Fluctuations Are Warranted

"Why is it," said my friend whom I will call John Skeptic, for he certainly is a real skeptic, "that in May, 1936, the price of Winnipeg wheat was 73 cents, and in January, 1938, it went up to \$1.54, and that now it is down to 77 cents? Do you think these fluctuations are warranted?"

A careful examination of the records revealed that when in May, 1936, the price of wheat was 73 cents, the Liverpool future was 83 cents which is the proper price relationship—and that there was available then plenty both of Canadian and World wheat; that by January, 1938, there was considerably less World wheat, so the Liverpool future price rose to \$1.15, but there was proportionately such less, indeed quite insufficient high strength Canadian wheat, so the Winnipeg price went to \$1.54.

Now, however, the World price of wheat is down again to 78 cents and Winnipeg down to 68 cents, simply because there will soon be more world wheat, and more Canadian wheat than may be required.

Actually we see in these fluctuations, the law of supply and demand in action, showing how prices fall when supplies are abundant, rise when supplies become scarce, and rise very high indeed when supplies become insufficient.

Last week we were notified five men putting up the fence around the new park and they didn't charge anything for their work either. These good scouts were Messrs. J. Kitchen, M. Rindahl, O. Johnson, J. Byres and J. "Smery". Messrs. Alex. Paterson and Sid Bailey also did a lot of hard work on the drain from the pool. Many hands make light work. It won't be long now.

should do so by letter to the Officer Commanding, Western Air Command, Vancouver, B. C., prior to 1st September, 1938.

Girls Soft Ball Game Here Last Sunday

Played Only One Game Because Of High Wind in Evening

The Girls Soft Ball team of Lethbridge was here last Sunday. Arrangements had been made to play two games—one in the afternoon and one in the evening.

Unfortunately only the afternoon game was played. A very high wind accompanied by terrific dust made it impossible to proceed with the evening game. Both teams were willing to try it for a time but they were finally forced to give up. The Lethbridge girls left for home early in the evening.

In the afternoon there was a splendid game in which the visitors won out with a score of 7-4. Both teams put up a fine article.

After the afternoon game the visiting girls were taken to the homes of the local girls for supper. A corn roast which had been arranged to entertain the visitors had to be abandoned owing to unfavorable weather.

It is hoped the weather man will do better the next time the two teams are scheduled to meet as they are well matched and gave the fans a real treat.

Reduced Rates West On C. P. R. Soon

Tickets on Sale September 3rd To 11th Inclusive

Those who are planning early fall vacations will welcome the announcement of Barban Fare to the Pacific Coast by Mr. A. R. Ballantyne, C.P.R. Ticket Agent. Tickets will be on sale September 3rd to 11th, inclusive, with 30 days return limit, and will permit stopover at Calgary, Nelson and stations west, which will allow passengers an opportunity of seeing the Rockies in their Autumn splendor.

A feature of these fares will be the privilege of tourist or standard sleepers at slightly higher rates and usual berth charge.

A special low fare good to coaches will also be available.

The early fall is a particularly good time to visit the Coast, and a delightful period in which to travel. Those contemplating a trip at this time should get in touch with Mr. Ballantyne and obtain full particulars.

Six cases of infantile paralysis are reported in Medicine Hat this week.

St. Ambrose S.S. picnic was held at Central Park, Medicine Hat yesterday afternoon.

Mr. and Mrs. Myers of Medicine Hat were dinner guests of Mr. and Mrs. J. W. Campbell on Wednesday evening.

Local Citizen Gives Opinion of A New Act

Claims Nothing Difficult About Formation of a Credit Union

The Alberta Act respecting Credit Unions is the result of careful study of acts long in force in other provinces and states. There has been an attempt to make it the best and most comprehensive of them all.

There is nothing difficult about the formation of a credit union. The Act limits its functions only as a protection to those who participate in its formation. The functions and powers of the credit union in Alberta are briefly:

1. It consists of members who have paid up shares of \$5.00.

2. The officers consist of a board of directors, a credit committee, and a supervisory committee. In this sort of organization no small group could use the credit union for its own ends.

3. The primary function of the union is saving. It may, though, borrow money, mortgage its property and loan money.

4. A reserve fund must be set aside and a fund may be used for educational or advertising purposes.

5. It may make loans only to members or other unions.

6. The loans must be for a productive or merchandising purpose.

7. The members share in any earnings.

8. Members must be approved by a majority before joining and may be expelled by a majority.

The credit union recently formed in Redcliff will provide an opportunity for the wage earners here to build up a reserve fund of their own. It will enable members to use their own money for productive purposes such as building, merchandising, etc. It is a chance for the people to spend their money in order to use their own credit.

There is nothing new about the credit union idea. It is the same sort of plan that the London merchants first followed in forming the Bank of England. The plan has been successful in any part of the world it has been followed because it is economically sound and useful. All it requires is the support of those it will benefit.

Former Lad of Here Wins a Good Prize

Joe Dutton is Son of Mr. and Mrs. Dutton Here

Word was received in Cadomin Alberta, from the Olympic Bridge Club of New York, that Joseph Dutton, mine manager of the Mountain Park Collieries has been declared Bridge Champion of Northern Alberta. This contest was held in the majority of towns in Alberta and scores were forwarded to the Ontario Headquarters in New York. John Lukivich was his partner. Joe is well known in Redcliff, as he is the son of Mr. and Mrs. Dutton, who have been residents here for many years.

Teaches Farley To "Draw Long Bow"

Keen appreciation of the wonderful playground Canada possesses in the Canadian Rockies was expressed by John Farley, industrialist-general of the United States and organizer of the Democratic Party, who spent a few days with his daughters Ann and Betty at the all-Indian playground, they took part in the various activities usually enjoyed by the international colony there and thoroughly explored the surrounding country by motor. Mr. Farley, who is noted for the fact that he can call people by their first names years after a single meeting, will have a hard time forgetting Jacob Two Young Men, chief of the Shoney Indian tribe, whom he showed him how to handle a bow and arrow in the ancient Indian style. Interested in the spectacle of their daddy taking orders from someone less than President Roosevelt himself are Ann, left, and Betty.

WORLD HAPPENINGS
BRIEFLY TOLD

Great Britain has been divided into 100 parts by the home office so that in event of hostilities any one of the threatened districts may be warned of air raid danger.

Police at Orillia, Ont., established some kind of a record while solving a jewelry store robbery. The jeweler reported that 42 watches had been stolen, but the police recovered 43.

Dr. W. C. Graham, professor of Bible languages and liturgy at the University of Chicago, will become president of United Colleges, Winnipeg, Oct. 1.

A new agreement cancelling post-war limitations on Bulgaria's army was seen in diplomatic circles as an important step toward Bulgarian membership in the Balkan entente.

An official statement issued at Buckingham Palace said "no plans whatever" had been made for a trip to Canada by the King. There have been reports some a journey was contemplated by His Majesty.

A convicted spy, Kurt Lenz, hanged himself in his cell at Mareille, France, after serving a 16-year prison term to which a war court had sentenced him several hours earlier.

The International Institute of Agriculture, Rome, estimates the European wheat crop, exclusive of Russia, at 42,500,000 metric tons. This is equivalent to \$1,600,200,000 bushels.

Two new units were added to Premier Macdonald's naval forces when the 2,000-ton destroyer *Albatross* was launched at Lethbridge and the 1,600-ton destroyer *Pittwater* slid down the ways at Annapolis.

Profit On Illicit Drugs

Shows By Department Of National Revenue Official Records

Indication of the fortunes which have been made in the illicit drug traffic in Canada is shown by the records of the department of national revenue on the importation of cocaine, morphine and opium.

In 1919, more than \$550,000 of these narcotics were brought in during the customs supposed to be for legal and medicinal purposes. The fact that easily \$800,000 worth found their way into the illicit trade is shown by customs figures that all that was required and allowed entry in the last 12 months amounted to a total value of \$42,210 and \$3,550 during the previous year.

Of these importations, 70 per cent. are administered as straight narcotics and 30 per cent. are used in narcotic preparations. No narcotics are permitted to be brought in for the manufacture of what are generally known as patent medicines, according to officials of the narcotics branch of the department of justice and national health which administers the law with the assistance of the Royal Canadian Mounted Police and the department of national revenue.

New Engine Type

Steel Replaces Aluminum To Increase Power Of Aeroplanes

Discovers a new type engine, in which steel replaced aluminum alloy in the crankcase to produce a marked increase in power, was used by Howard Hughes in his recent round-the-world flight was made by the Wright Aeronautical Corporation.

With one of the new motors which have been on the government "secret list," on each wing, Hughes was able to obtain a total of 3,200 horse power for take-off with heavy loads. The same motor without the steel crankcase produced only 1,000 horsepower.

Though the engine weighs more, it weighs less per horsepower produced. The company explained the heavier metal permitted higher super-charging—greater combustion pressure in the cylinders.

Four hundred motors have been ordered to power the 500 high-speed bombers ordered from the Lockheed Aircraft Corporation of Burbank, Cal., by the British Air Ministry.

Early War Measures

The earliest fortifications of Argonades have been unearthed, and archaeologists reveal that the inhabitants of the ancient city decided about 5,000 B.C. that a wall 18 feet thick was not protection enough—and doubled it. Was this the first of the oldest as well as the costliest of arts.

These out of every five new automobiles purchased are bought on the installment plan according to statistics.

All dogs in Barcelona, Spain, must carry number plates, according to a new law.

Inherited Wealth

Eighty-Year-Old Daughter Of David Livingstone Has No Home

Mrs. Livingstone Wilson, 80-year-old daughter of David Livingstone, the missionary-explorer, and only living link with the famous Scotsman, was entertained to lunch at the Empire Exhibition in Glasgow by the men who built the model of the Victoria Falls in the Exhibition.

When she saw the plaster statue of her father which towers above the Falls model, Mrs. Wilson, surprised and delighted, remarked on the fine likeness achieved.

Mrs. Wilson, youngest daughter of Livingstone's was born in Dechuamland. Brought up in Scotland, she saw her father only once in his life—for three weeks. And she confessed to a childhood opinion that he was not half so nice as his brother.

Her father has bequeathed his wanduit to Mrs. Wilson. At 80, she has no home, and travels all the time. Part of her life is taken up with lecturing, to the extent of a childhood opinion that he was not half so nice as his brother.

Her father has bequeathed his wanduit to Mrs. Wilson. At 80, she has no home, and travels all the time. Part of her life is taken up with lecturing, to the extent of a childhood opinion that he was not half so nice as his brother.

Standing under the statue to the memory of Lord Hanan, mighty Canadian aviator whose career has never been equalled, Bob Pearce (right), holder of the world's professional sculling title, tells Joyce Padden (center), Australia's leading sculler, something of Hanan's prowess; while Elwood Hughes (left), general manager of the Canadian National Exhibition, listens with keen interest. Padden and Pearce will race in front of the Hanan Memorial this fall at the C.N.E. Regatta when several scullers with international reputations will attempt to wrest the world's championship from Pearce.

The Destructive Insects

THE CANADIAN INSECT BOARD

Causes Many Diseases And Also Much Loss Of Food

The canals inured by the attacks of insects are extensive and costly. Between 1915 and 1926 insects caused a loss of \$1,375,000,000 in Canada, which is about as much as the Dominion spent on the war and demobilization. In the United States the annual loss is \$2,000,000,000. In India insects kill 3,000,000 people, and do damage amounting to \$75,000,000. Dr. A. S. Neave, of the Imperial Institute of Entomology, estimates that ten per cent. of all the food produced in the world is destroyed or lost through insects.

PROPHETIC OF TAILORED

By Anne Adams

Although, comparatively small in manpower, the Czech army is one of Europe's best-armored and equipped forces, with a splendid military tradition and thorough training. Military experts agree that while it might be possible for Germany to overrun Czechoslovakia as it did Austria, a terrible price would have to be paid.

Country Well Defended

Military Experts Agree Invasion Of Czechoslovakia Would Not Be Easy

The 2,500-mile front of Czechoslovakia—touching hostile territory all the way round except for 150 miles bordering friendly Rumania—is heavily and cleverly fortified. Military experts believe that despite the comparatively small size of the Czechoslovakian army, any invasion across the three defensive lines built by the Czechs would be made at heavy cost.

If the border were crossed, the first defense stand would be made about 40 miles inside the border mountains in a lovely region of hilly wooded meadows. The next stand would be about 100 miles farther inland, and the third line of defense runs still farther back, along the Yang River territory where the population is more purely Czech.

Although, comparatively small in manpower, the Czech army is one of Europe's best-armored and equipped forces, with a splendid military tradition and thorough training. Military experts agree that while it might be possible for Germany to overrun Czechoslovakia as it did Austria, a terrible price would have to be paid.

May Reduce Expense

Device Cuts Cost Of Operating Modern X-Ray Machines

Dramatic reduction in the cost of operating modern X-ray machines required for development of high direct current voltage in treatment of cancer and other diseases was demonstrated at Winnipeg by Prof. John W. Dorney, of the University of Manitoba. Prof. Dorney exhibited two inexpensive machines, one of which turned out 100,000 volts and the other 40,000. The machines which look to be nothing more than a collection of radio tubes and small transformers, mounted in an oil bath, make use of vacuum tube rectifiers costing only about \$1.50 each. These tubes can be replaced at any time.

The Queen Mother

Has Won Imperishable Place In Hearts Of British People

London dispatches state that thousands of persons gathered along the banks of the Thames to cheer the King's mother. This was to be expected, course, for Queen Mary has won such an imperishable place for herself in the affections of the British people that whenever she goes she is the subject of popular acclaim. The whole history of the monarchy has known no more devoted mother and mother, no more charming lady.

Girl Wins Battle

A 17-year-old Danish girl, Jenny Kammergaard, completed a 28-mile swim of the Baltic sea between Denmark and Germany in the unofficial time of 40 hours and 30 minutes. She believes she is the first person to swim the Baltic.

A London diarist tells the following tale: A Dutchman remarked to a Dutchman the other day that Hitler would be in London in a few months time. "Yes," said the Dutchman. "I know. The Kaiser is here already."

Settled By Arbitration

Police Chief Schuster, Franklinville, N.J., found two negroes battling in the middle of the street over a half dollar and gave each negro a quarter and a lecture on economics. The negroes departed arm in arm and scheming continued on the beat.

Under One Flag

Around Between France And Britain Suggests Military Alliance

It was not in indulging in a flight of oratory, and therefore no reason for assuming that he was, Leslie Here-Belton, British foreign minister, spoke in a way which has large implications when he said that Great Britain and France are now united under "what seems to be one general staff and one flag."

Such words as these, coming at the close of a series of notable military manoeuvres, every one of which suggested not only a military alliance but also a program for quick and effective mobilization, were very carefully arranged except the selection of an international commander-in-chief, and that perhaps not left altogether to chance.

Naturally the details of the new military alignment are not being given out, but the fact that it exists, and the words of King George last week made this evident before Mr. Here-Belton spoke, is being developed in a way the Mussolini-Hitler alignment cannot be developed until the justness and auspiciousness of the two dictators are ended, seems to be one of the best prospects for peace Europe has seen for a long time.—Detroit Free Press.

Bomb Proof Shelters

Could Make London's Population Safe From Explosives

London's population could be made safe from being exploded by bombs for about \$435,000,000 or a little more than \$400 a head, the Association of Architects, Surveyors and Technical Assistants declares.

The architects' report, based on the results of a year's research, states that bomb-proof shelters could be built in London's great strata of blue clay would be slightly more expensive to build than the covered surface trenches advocated by the government A.R.P. policy.

The trenches, it is pointed out, would be merely blast and splinter proof and would provide no protection from the danger of high explosives. The architects suggested shelters would afford perfect protection against high explosives.

Plans for the proposed shelters show tunnels seven feet, six inches high and six feet three inches wide lined with steel. They would be gas-proof and contain air-conditioning plants, dressing rooms and decontamination facilities.

Profits Usually Small

U.S. Government Bulletin Shows Crime Literally Does Not Pay

That "crime doesn't pay" appears to be in danger of becoming one of the commonest platitudes which lose all meaning through repetition. This would be a pity, for, as applied to the great majority of criminals, it is literally and actually true. An illuminating proof of this fact is furnished by the government bulletin which discloses that last year in the United States the average robber got only \$59.20 and the average burglar, \$50.16, and the average gambler, \$29.37. In other words, the average criminal, in ten years and twelve months, gambles on the average violent death or long terms of prison for such paltry gain.—Columbus Dispatch.

The Queen Mother

Has Won Imperishable Place In Hearts Of British People

London dispatches state that thousands of persons gathered along the banks of the Thames to cheer the King's mother. This was to be expected, course, for Queen Mary has won such an imperishable place for herself in the affections of the British people that whenever she goes she is the subject of popular acclaim. The whole history of the monarchy has known no more devoted mother and mother, no more charming lady.

Protecting Wild Life

Writer Calls Jack Miner The Most Practical Naturalist

(By Lucie Conner)

It is not only the American humorist and story teller, used an apt phrase when he called Jack Miner "the greatest practical naturalist on the planet." Not by theory but by the most intensive study of wild life has the Kingville naturalist acquired his knowledge.

From childhood to his present age of 73 years, the silver-haired woodsman has been absorbed by plants and animal life. Nor has this been wasted in aimless calculation of the indeterminate collection of statistics. His interest lies in the very practical field of providing food and shelter for such species of birds as the "Kingville" grouse in the fall.

Programs of wild life conservation have not in the least new. Many have been advocated by university biology experts in the past, but few were practical. It was Jack Miner who put the practice of wild life conservation, and he continues to do so. The planned economy so characteristic of the naturalist is noted at the "Kingville" home and when there, where the many flowers and trees can be cared for by just one man and a horse.

An Eccles J. Gott, ex-M.P. for South Essex, sat on the floor of the House of Commons and told the House that Jack Miner is protecting and caring for more birds than all the game wardens in the Dominion of Canada.

Seven Ages Of Elephant

High Points Colossal Very Nearly With Corresponding Age In Man

A letter to the London Times says it is a curious fact that the age at which the "elephant" comes into the life of Indian elephants coincides very nearly with the corresponding age at which the "elephant" comes into the life of man. The elephant usually comes in order of intelligence. Burmese elephants born in captivity begin to leave their mothers and are at four years old, and are and are mischievous little boys and girls elephants to about four years of age. At five years of age they start to learn to work for their living. About 21 they grow up and are able to take care of themselves and are in their prime from 30 to 50, and then on towards old age sets in until after 60 years of age they are generally dead. A working elephant in Burma is old at fifty, but wild ones, if not unharmed by the power of a good pair of tusks, often live out their allotted span, and, as with man, sometimes exceed it.

Prefer Home In China

Army Officers Recruited By Germany Feel A Little Unhappy

Apparently German officers recruited from China by request of Japan have some doubts about their future in Nazi land. There is difficulty about their recall back to China, according to the London Times, which will involve a certain amount of difficulty. Some of them don't want to return. They are not very happy in Germany, and they feel just a little uneasy.—London News.

A native of Czechoslovakia is not a Czechoslovakian but Czechoslovak, and his policy is not Czechoslovakian but Czechoslovakian, and that isn't something to get excited about on a hot day, what is?

Poland and Lithuania, ataggered by the end of the war just three months ago when they reached an agreement, now find that they get along well together. Fifty more people don't try friendship.

On a bookplate of Sir Walter Scott is this inscription: "I return this book. I find that many of my friends, while poor arithmeticians, are excellent book-keepers."

Some Disadvantages Of Sunshine

Hard Work In The Hot Sun May Cause Heat Prostration

A sunburn may be prevented by the previous application to the skin of a solution of Epsom salts or by similar use of a tannic acid solution, two teaspoonfuls to a glassful of warm water. Even strong tea may be used in an emergency.

Excessive or hard work in the sun may cause prostration. In severe cases the victim may have cramps in his legs. The profuse sweating involves not only a loss of water from the system, but it occasions a loss of salt that seems to upset the chemistry of the body. Under such circumstances very dilute salt water is quite palatable and, oddly enough, quenches thirst better than plain water.

Heat stroke, popularly called sunstroke, is due to exposure to heat under conditions of high humidity which prevent the normal heat loss from the body. The body's normal heat-regulating mechanism is failed. This condition may begin with headache, dizziness, thirst or nausea; often there is a sudden rise in body temperature with a rapid rise of body temperatures as high as 107 or 110 degrees F. Heat stroke should be avoided if at all possible by the victim of heat stroke is thereby rendered sensitive to future heat exposures even as low as 100 degrees F.

High external temperatures complicated by stagnant or moist air, which fails to assist in the cooling of the body surface by evaporation, are causative of heat stroke. Under such conditions bodily exertion must be limited. The wearing of light, well-ventilated headgear gives a degree of protection.

If actual heat stroke has occurred or appears about to occur, the person should be taken to a shaded place or to a cool place where the body should be wrapped in a sheet wet in cold water and cooled by evaporation. If a fainting current of air is to be maintained, the temperature should be taken frequently and artificial aid to heat should be discontinued when the temperature has fallen to 102 degrees F. Plenty of fluids should be given by mouth. Many of these cases are more serious and in all cases should be under the supervision of a doctor.

Sunburn, heat prostration and heat stroke are some of the disadvantages of sunshine. They may be avoided. After all, they do not counter-balance the good that in a variety of directions come from the rays of the sun.—By John W. B. McCullough, M.D., D.P.H.

Author Was Britain's Friend

Owen Winter Did Much To Improve Relations With United States

Owen Winter, who died at North Kingston, Rhode Island, not only was a noted author, but was also a real friend of the British Empire. In his "The Ancient Greeks" Winter set his fellow-countrymen to work on many of the facts of history. He assailed the practice, once prevalent in some quarters across the line, of painting Britain as a country that was bent on doing harm to the United States. Winter showed how often John Bull had stood back of the right of the United States in physical as well as moral support in many instances. Undoubtedly Mr. Winter did much to improve the relations between the two great branches of the English-speaking world. For that alone he deserves the respect of peace-lovers everywhere.—Nigara Falls Review.

Nothing Seems Impossible

Practically Everything Can Be Done By Movie Property Men

How motion picture property men can do the seemingly impossible was demonstrated recently during filming of a new feature, when two additional oak trees were needed in a hurry. Workmen took casts of the bark, then molds were made of wax and sheets of plastic were made of the wax cast. Painters then colored the synthetic bark, and wrapped it around wooden forms to simulate the trunk of the oak tree.

Research On Grasses

The United States' government is trying to find out why a new set of certain grasses and passes up by P. V. Cardon, in charge of grassing research work of the agriculture department, said the work is being carried on to determine what grasses are best suited and best long-lived in pastures.

Where The Horses Are

According to J. C. Robertson, live stock superintendent for Saskatchewan, his province contains approximately one-third of the horses in Canada, and is the largest producer of horses in the Dominion.

Lines For Airplanes

Has Proved Greatly Superior To Silk As Wing Fabric

War airplane manufacture now provides a market for Canadian flax, which has been found superior to silk as wing fabric. While silk rises when struck by bullet lines show the bullet to go through, but holds its shape otherwise. This is the report of J. P. Cloutier, general manager of the Co-operative Agricote de Lait de Val-d'Or, who has just returned from Europe, where he studied the latest developments in reeling. Mr. Cloutier brought back about \$100,000 worth of flax pulling machinery.

Farmers in the co-operative this year have 5,000 acres under flax, an average of ten acres each for 500 farmers. Besides the sale of three for linen there are two large markets for flax products. The best of the Canadian seed is exported to Ireland, where the climate is too moist for flax seed to develop properly. Most of the remainder is sold to linen companies in the United States.

The flax fibres are treated in the co-operative's factory at De Beaulieu, where the flax is first spun. Belgian workers had to be employed to handle the flax, but now Canadian, too, are assisting the process.

Bold New Home

New Residence For Earl Of Egmont On Farm Near Calgary

A modern country estate home to replace a \$25,000 one destroyed by fire last February will be constructed by the Earl and Countess of Egmont on their farmstead a few miles south of Calgary. Alberta's rancher and his wife recently returned from a visit to the second Earl of Egmont, who is to live in it until 1940, when Viscount Perceval, their son and heir, becomes of age. He will be taken to school in England. The vicount will be six years old Aug. 17, 1940.

The Earl and Countess of Egmont plan to live in England while their son attends school except during the holidays, when they will return to Alberta.

Plenty Of Planes

Old U.S. Army War Machine Tremendous Air Armada

The United States army has made a surprising discovery that the working of an old law authorizes it to acquire a tremendous air armada of 1,190 planes. The discovery was made more than officially credited to any military power and overhauled the navy's 3,500-plane authorization, which Congress voted this year. It is nearly double the army's accepted goal of 2,350 modern aircraft. Paced with manufacturing difficulties in reaching even this lesser goal in the next 25 months, officials made it clear that the army is not in a position to acquire more than 4120 planes in the immediate future.

Insignia Is Valuable

Real Diamond In Star And Collar Of Order Of The Garter

The Duke of Devonshire has delivered to the King the insignia of the Order of the Garter held by his father, the late duke. The Star and Collar of the Garter, the highest order of English chivalry, are made of real diamonds and are worth together several thousand pounds. If a Knight of the Garter loses his insignia, it is his duty to replace them with his private purse. The originals are paid for by the King out of his Privy Purse, and at the death of a knight they return to his Majesty.

Canadian Timber Best

But Cannot Compete In Price With Scandinavian Wood

"Canadian timber stands up better than Scandinavian timber, its chief competitor in England," Ernest Pottinger, a builder from Blackpool, visiting at Kitchener, Ont., with party of eight British tourists, said. "The biggest trouble with Canadian lumber is that it can't compete in price with the Scandinavian wood. Canadian product is always ahead of its competitor in dollar for dollar value, however," Mr. Pottinger said.

Fuzzed By Prison

Kathleen Brothers, Santa Rosa, Calif., hardware merchant, received an order for much wire from a ranchman quoting prices in one of their newspapers. The ranchman was a bit puzzled by the price, however. Investigation developed that the advertisement had been clipped from a local paper of 26 years ago.

He: "Will you share my lot?"
She: "That depends on whether it is a lot."

KING AND QUEEN UNVEIL MONUMENT IN FRANCE

Queen Elizabeth is shown depositing a poppy upon a wreath which King George VI laid at the foot of the Australian Memorial at Villiers Bretonneux, Amiens, France, after he had conducted the official unveiling. This Memorial has been erected by the Imperial War Graves Commission to the honor of eleven thousand Australians who fell in France and have no known graves.

Not Of Much Value

Children With Handicaps Plunged No Good As Workers

Like some women, the more beautiful a chicken is the less value she has to the world. This fact was learned from W. T. Scott, head of the poultry industry at the Harrow Experiment Station. He was selecting a couple of birds as the best and went to the division to display to visitors to the Harrow Farm on the "Field Day." Strange to say, Mr. Scott was picking the ugliest bird as the best and the best looking bird as the worst. This is explained by the fact that the valuable bird works hard and laying eggs in which business she has to be getting on with in the morning. It isn't much time for plucking on the other hand the bird with the handsome plumage shows by it that she is a stunner, not a worker.

Warships On Parade

Showered Patriotic Britons With Increased Taxes Went On Parade Recently At Portsmouth, England, to prove to patriotic Britons they are getting a lot of preparedness for their increased taxes.

The admiralty opened the gates of the three biggest dockyards at Portsmouth, Chatham and Plymouth to a week of large-scale displays of material and manpower. The idea was to show how British fighting forces are expanding swiftly. It is hoped also that more recruits will join the service.

Dislikes Sons Civilization

Lincoln Eldridge Starts On Fourth Trip To Antarctica

To escape the noise and confusion of civilization, Lincoln Eldridge, who has flown over both North and South Poles, has started on his fourth expedition to the Antarctic. "I can never stand crowds," he said before leaving the Burgess at New York. "I like to be in the wilderness where a sense of God." From South Africa, to meet his ship, Wyatt Earp.

Flying at a speed of 280 miles an hour, an aeroplane could fly around the moon at its equator in 24 hours.

Italy has built a new liner for Norway and Norway has paid for it out of her surplus of codfish.

Safety On The Highway

Slow Down And Let The Speed Find Its Own Way

"When a car is passing you take your foot off the gas. That doubles its speed and gets him past quicker." This suggestion was made in a letter to the editor of the Chico Record. It appeared to him to make the following comment which is well worth passing along: "Many of the worst accidents have come from drivers making it harder for cars behind to pass them, instead of making it easier."

"Often the situation develops into a race, with both cars going faster and faster. This tragedy is imminent at a turn in the road, the approach of another car or the sudden appearance of a steep hill ahead—and possibly cars coming up." "It used to be regarded, in the early days of motoring, as legitimate sport to try to beat the other car. That notion has largely vanished, since almost every car now will go faster than anybody has any business going and everybody knows it. If the fellow behind is a speed devil, the sooner he passes the better for you."

Wrote War Song

Author Of "It's A Long Way To Tipperary" Dies In England

The man who wrote the famous British war song, "It's A Long Way To Tipperary," died recently in Birmingham, England.

He was Jack Judge, 60, a faithful member of the British Legion, a vaudeville headliner. He had been in ill health for some time. His political views were liberal. He was a writer, having judged had written "a soldier's anthem which actually helped win the war."

Too Bad For Father

"Mother," said the young lady of the house, "I advise you to read the latest issue of the 'Herald' because that name that I would like to make the acquaintance of a refined gentleman who is a woman." "How dreadful of you," gasped her horrified parent. "Did you get any answers?"

"Only one—from Father!"

"Gee, was the original 'Inquiring reporter.' More than 2,000 years ago he wandered the streets of Athens, telling the people with questions to stimulate their thought."

Followed Old Custom

But Dolls Princes Sent To British Princesses Were Special

When Marianne and France, the two magnificent dolls prepared in Paris for Princess Elizabeth and Margaret Rose, crossed the Channel to greet their new mistresses they followed a custom of many centuries. As long as there have been princesses such gifts have gone from one country to another. Dolls from Russia and France and Germany have found their way into Buckingham Palace and some of them may be seen today in the Royal Museum of London, where are displayed the toys of Victoria, Alexandra, Mary and other royal children.

Nothing in the past, however, can approach the sumptuousness of the toys for these dolls given by the "Children of France." No doubt one day after the princesses have enjoyed them, they too will find their way to the showcases where their treasures will constitute one of the most complete records of feminine apparel at any given period of history. In special roadsters were also made for them by one of the largest automobile companies in the country. The dolls will no doubt delight Princess Elizabeth and Margaret Rose but they will also show a future queen of England what French genius can do to clothe a woman in beauty.

Showed Some Improvement

Sales In Rural General Store Increased During Storm

The Dominion bureau of statistics reported country general store sales were two per cent. higher in June than in June, 1937, according to returns received from more than 700 of these general merchandise stores located in smaller towns and rural areas.

Improved agricultural conditions in the west led to marked gains in the sale of farm products. Sales in Manitoba were up 10 per cent., in Saskatchewan five per cent., Alberta four per cent.

In New England, an earthquake that occurred in 1755 was attributed to the use of lightning rods in the community.

"Some men," remarks a trade publication, "grow under responsibility; others only swell."

Successful Farmer

British Homeowner Makes Good In Southern Alberta

This is a story about a Southern Alberta farmer, and with it there is a moral or two. An Englishman with no knowledge of the ways of farming had been a mechanic before he left the old land—look up a home-owner in Southern Alberta. In the time he has been here, he has grown through lean years as well as good. To-day he is in the possession of a thousand or more acres, all paid for. He isn't in debt, for he cleared up all his liabilities last year. This year he has 900 acres in crop, and if it yields as well as it promises now, he will have a tidy sum to his credit in the fall of the year.

This farmer never worked on a farm until he came to Alberta. He has learned an awful lot in the meantime. He doesn't turn up his nose at the fellows who recommend sweet clover, rye and created wheat crops. He doesn't mind a change on the Experimental Farms or those who edit the farm pages of newspapers. He doesn't know who they are talking about. He believes they do, and he often follows their suggestions. The result is that he is a good farmer and a successful one when other farmers get very little.

Neither does he live by grain alone. He doesn't mind a change on a farm until he came to Alberta. He has learned an awful lot in the meantime. He doesn't turn up his nose at the fellows who recommend sweet clover, rye and created wheat crops. He doesn't mind a change on the Experimental Farms or those who edit the farm pages of newspapers. He doesn't know who they are talking about. He believes they do, and he often follows their suggestions. The result is that he is a good farmer and a successful one when other farmers get very little.

Now for the morals to be drawn from this farmer's success. First, it isn't necessary for an Englishman to be a farmer. He would only come to Canada to take up a farm. If it were possible to fill Alberta up with the kind of farmer who is coming to Canada, there would be a better Alberta. Moral two, it is that farming can be a good way to pay and you can get out of debt. If you follow the plan our English friend has followed, and do not assume to handle more than you can handle, you will be successful.

This Englishman credits the banks with having given him a lift up. Instead of making the banks as so many Alberta farmers have been doing in recent years, our friend praises them as having given him a helping hand. Remember to credit the Englishman and what he has achieved in Alberta when you meet a grower who says that farming doesn't pay, and it is impossible for a farmer to keep out of debt.—Lethbridge Herald.

Cannot Run Away

Japanese Must Stay To Repair Any Damage From Air Raids

Shimonoseki, the harbor, as so many Japanese must remain where they happen to be when the alarm is sounded, according to Home Ministry orders. They must keep their heads and bury themselves in minimizing whatever damage they may suffer. As a matter of principle, declared Chief Koichi Kameyama of the air-defense section, "the taking of refuge during an air raid will not be recognized. If the people run away from their homes there will be no one to fight them from incendiary bombs."

Paying As They Go

Rome Municipalities Barring Interest Charges By Paying Cash

Mace and more the principle of municipalities' paying their way as they go, instead of piling up debt is coming into discussion, for the saving in interest is an important item in keeping down tax rates. It is found. Saint St. Marie, Mich., is an example of a community close to the South, which has cleared off the debt and which pays for expenditures on public works out of current revenue, or at worst issues only very short term debentures.—Saint St. Marie Star.

Family Day In Court

It was family day in Magistrate Joseph MacDonald's court at Sydney, N.S., the other day. The judge's two barrister sons, Ronald and John, crossed legal swords before their father. Ronald defended Tony Tortello, charged with reckless driving, while his brother conducted the prosecution.

The paper wrapping of cigarettes is done away with by a new Hungarian invention. The tobacco in the paperless cigarettes is wrapped in a special tissue formed of three and tobacco leaves.

VETERANS REVIVE OLD MEMORIES

Tourists have been lured by thousands of soldiers who upheld the hero of the country in the stirring days of 1914-1918. The Canadian Corps Museum has brought together at the Exhibition Grounds old comrades who live the old days and re-tell the old stories. Our picture shows part of the French Village which has been constructed in the Coliseum; though which beretted veterans surge in joyous groups.

"Five. That's right. What'd you two take up those for?" he asked. "That's 400 acres of land that isn't even near water."

"Have you got the government record for the lease?" insisted Hammond.

Barstow tossed it over. The prospect looked at it and handed it back.

"If Joe and I make anything out of this find—that's probably where we'll do it."

"I thought the stuff was all in the Loon creek sands."

"That's an old crony," answered Hammond. "Loon creek has wandered all over the map. We've got to find out where it is. It's been a couple of hundred years. If we get into big money, we've got to find the old bed of the Big Moose. The real one where nuggets were piled up for a thousand years or more."

Barrow nodded.

"Well, you've got the country checked; no reason why you shouldn't have luck. Going out in the morning, you'll find it."

Hammond laughed.

"Who isn't?"

Barstow, used over. They talked for awhile, of the developing rush into the new gold regions, the westward ho, and the prospect of a big find. The seeker would carry into the North, for what would be realized. At last Hammond said:

(To Be Continued)

Beat The Depression

Unemployed Man Builds Up Business On A Small Capital

Five years ago unemployed Ham Broe invested his last \$60 in a boat registered on the banks of the Red River in the town of Winnipeg. To-day he employs six men and his investment has grown to 600 feet of docks and 100 boats and two machine shops.

Born 46 years ago on a remote Dakota ranch in the North West, Broe first came to Winnipeg in 1910. In 1933, jobless and almost penniless, he conceived the idea of a boat launch in beach territory. "The river water is as clear as lake water, perhaps cleaner," he thought. Since then his business has prospered. On his own property he has filled in river bank sides which required 3,000 yards of earth.

"I haven't been easy, but it has been good," said Broe. "I sleep on the job, and I get up each morning at 5 a.m. to do it. He visited the day when slow-moving houseboats and pleasure craft will sail the river and his boats will be landed with drive ways and dotted with swimming pools, cottages and havens of recreation for tired city folk."

Fishing In The Upper Air

Scientists Look Above The Earth For Rust Sprays

United States agriculture department scientists are going fishing in the upper air for rust, living spores they hope which have new light on control of destructive plant diseases, including black stem rust of grain. They are going after above the earth with a "sky hook," resembling an instrument once used by Col. N. Charles Lindbergh for studying the upper air. In this they will attempt to collect specimens of minute plant parasites that float in air currents at great heights.

Seeds Were Still Alive

Taken From Egyptian Tomb Yield Green Peas In Blue Pots

Green peas in blue pots were exhibited in England at a Harrow World (Middlesex) horticultural show.

They had been grown from seed which had been lying dormant for 4,000 years in Tutankhamen's tomb, discovered 25 years ago.

A. Aldridge explained that one of the excavators handed some of the seeds to a gardener. To the gardener's amazement, the seed grew. A few of the pots were given to Mr. Aldridge's son, who began growing the peas on a large scale.

Water is essential to the existence of every known form of life.

"Not if he's been in the bush so long that he's grown moss. God is fed up with the North. But I'm going to get back now. That's why Joe wanted me to see you. To check up on all our claims. Stakers will be running around bog wild in the snow up there in another month."

The attorney advised about to his client and brought forth a fat envelope, scattering the contents on the desk.

"That's all," he mused. "Three regular creek placer claims apiece on Loon creek, 200 by 100 feet of Montana Creek."

"That's right. How about the half-mile government lease at the headwaters of the Loon?"

"Everything's paid up and granted."

"And those other five leases?"

Barstow counted the papers.

Fishery Production

Manitoba Leads Western Provinces In Value Of Output

Production of Ontario fisheries in 1937 had a market value of \$3,615,966 and a value at the point of landing of \$3,140,384, compared with values of \$3,208,427 and \$2,713,722 respectively for 1936, according to the annual report issued by the bureau of statistics.

Saskatchewan and Alberta and the Yukon Territory had an combined market value in 1937 of \$2,765,035 compared with \$2,337,663 in the preceding year.

Manitoba is the leading province with respect to value of fisheries production, with a total of \$1,798,011. Saskatchewan is second with \$877,109, Alberta third, with \$433,354, and the Yukon Territory last with \$4,467.

Each of the three provinces shows an increase in value as compared with 1936 while for the Yukon Territory a decrease is recorded.

Taking the provinces individually, whitfish is first in Saskatchewan while, with a total of 1,765,035, is first in Manitoba displayed pickled.

Safe Driving

U.S. Motorists Stopping On The Brakes Instead Of On The Gas

The fact that the United States are beginning to step on the brakes in time to save lives.

The United States National Safety Council reported that traffic fatalities for the first six months of 1938 were fewer by 22 per cent than during the same period last year.

By heeding the plea to drive more carefully, motorists saved 3,670 lives during the first half of 1938, the council said.

The steady decline in fatalities was due to a number of factors. An increase in highway traffic during the first five months. If the percentage of the fatalities for the first half of 1938, the council said, the year's traffic toll would be the lowest since 1928 and would represent a saving of 100,000 lives compared with 1937. June was the eighth consecutive month to register a decline. The death toll for the month was 2,070, or 24 per cent. under that of June, 1937.

Mercury Deposits

Located In B.C., May Be Used By Canada For Defense Purposes

Extensive new mercury deposits are reported to have been uncovered in the Kootenai, British Columbia. The property is owned locally by a group of eight men and specimens analyzed by the provincial assayer at Victoria are said to have run from \$40 to \$180 a ton.

A report has been sent to the Department of Defense, Ottawa, where it is stated that the extensive deposits are being studied by the department for their use in defense purposes.

A box of the ore has been sent to the Dominion Mines Department. The ore is 10 miles north of an operation on Mud Creek in the Bridge River valley, which has been under way for more than a year by Montreal and Vancouver interests.

The new body, believed to be in the 100-ton range, has lower grade value but has tonnage possibilities.

Honor In Arms

Duke Of Wellington Kipli His Word To French Marshal

The following story is taken from a letter to the London Times:

According to Sir William Fraser's "Words of Wellington," the Great Duke must have been one of the last exponents of "honor in arms"; "before the battle of Oporto," he wrote the Duke of Deu has been named by the French army. The Duke sent a note to Marshal Soult saying that he would, of course, take place on the following day; but that, as it was desirable in the interest of the defense of Oporto not to destroy the bridge, he promised that, if Marshal Soult would abstain from blowing it up, he would do so.

His army should cross it. Soult trusted him, and the bridge is to this day intact.

The Kitchen Record claims that had the trouble in the world can be attributed to Russia. That may be, but more than half the progress in the world is attributable to that very same quality.

Man-Do you know, honey, if I had to do it all over again, would I marry?

Wife-Oh, no, what?

Man-Do you know, honey, if I had to do it all over again, would I marry?

Wife-Oh, no, what?

Man-Do you know, honey, if I had to do it all over again, would I marry?

Wife-Oh, no, what?

Man-Do you know, honey, if I had to do it all over again, would I marry?

Wife-Oh, no, what?

Man-Do you know, honey, if I had to do it all over again, would I marry?

Wife-Oh, no, what?

I found

sweetening my morning cereal with BEE HIVE Syrup aids digestion.

TRY IT TOMORROW

Godrich Took Its Loss

Paid Off Railway Debt In Full For Which It Received No Benefit

The town of Godrich is to be congratulated for getting rid of its own railway debt. It has shown fortitude and persistence in meeting an obligation which, even though it was ill advised. Thirty years ago, bonds were issued for \$100,000 to subsidize the Ontario West Shore Railway. The road was never completed, but Godrich lived up to its end of the contract and has just paid off the last of the debt. Interest amounted to \$225,000, so the town is out of pocket \$325,000 for something of no value to it, unless the experience is counted as an asset.

Godrich, as it is noted, did not shrink its responsibility through either good times or bad. It has paid up, wiped out the debt with clean hands, and with conscience, and unswerving credit. Probably the good people of the community may be thought of beating the drum for the town of Godrich, although they were beaten by the promoters of the railway. In any event, they have retained a sound reputation and set an example in honesty for other municipalities—Toronto Glens and Mail.

Plans Adventure

Will Sail From England In Forty-First Boat To Visit To Canada

Two years of adventure lay ahead of Roy, John Antle, retired admiral of the Royal Canadian Mounted Police, who left Victoria for England with plans to return in a 40-foot boat. Mr. Antle, honorary sea captain of the Royal Victoria Yacht Club, had expected to set out from England in the little yacht. First stop before the end of August. Previous to his last return to Victoria was to be Newfoundland.

"After spending several months in that colony, he planned an extended cruise around the West Indies before passing through the Panama Canal and returning to Victoria two years from now."

Once before, the elderly clergyman voyaged from England to Victoria in a small boat. That was in 1933 when he brought the motorship John Antle to Victoria for use in his mission work.

An Unusual Plea

Maid Admitted Perial Guilt For Stealing From Employer

"Partly guilty" was the unusual plea entered by Mary Anna Alexander, a New York Negro housemaid, accused by her employer of stealing 80 pieces of silverware, linen and some furniture.

Detectives said they found 47 pieces of the stolen silverware and furniture in the defendant's home. "I didn't take the rest," the defendant said, explaining her plea.

There are about two and one-half miles of corridors in the famous Law Courts of London.

CHAPTER II.—Continued

Barstow looked out the rain-streaked window.

"Oh, yes, I remember. The newspaper mentioned that—of course it was romanticized. The poor boy went away, worked his way through college, looked for gold, found it, came back to Seattle, and accidentally met the girl he had loved for years—"

"Only it wasn't romanticized," supplied Hammond. "A friend told me about it—Timmy Moon, he's an aviator. Not working at it just now, I understand; something wrong with his plane. But no matter; we've met up again, of course—you know, home for the first time after all these years—I asked him whatever became of Kay Jones. There was a moment's pause. Hammond rubbed at his hot face. Then he looked up, a queer burning light in his dark eyes.

"You know, Barstow, it was the finest feeling I'd ever had, to find the house in an automobile and get out and walk right through the gate."

"Where you had played as children."

"Played nothing; that old granite block of a father never would let me inside the yard. You couldn't blame the kid for snoring me—with him telling her not to associate with ragtags."

"I suppose not," said the attorney, staring at his law books.

"It was funny in a way. Timmy had called up the house, but he hadn't said when he was bringing out. Kay didn't recognize me for a minute; I'd have known her anywhere."

"Naturally."

"Well, for awhile I wished I hadn't come. You see, I'd always dreamed of that house as the grandest place in the world—one of those old-time building-block places, with turrets and a slate roof."

"I know the kind."

"And Kay was a bit distant at first; you know, had to pick up the thread after all these years. Just for fun, Timmy pretended to have forgotten his handkerchief. So we reached for mine. I had a moon-hid bag full of nuggets in that pocket."

"Would he do it up that way?"

"Naturally."

"That's all right. What'd you two take up those for?" he asked.

"That's 400 acres of land that isn't even near water."

"Have you got the government record for the lease?" insisted Hammond.

Barstow tossed it over. The prospect looked at it and handed it back.

"If Joe and I make anything out of this find—that's probably where we'll do it."

"I thought the stuff was all in the Loon creek sands."

"That's an old crony," answered Hammond. "Loon creek has wandered all over the map. We've got to find out where it is. It's been a couple of hundred years. First St. Medicine Hat

**Interesting
Local Items**Miss Edith Collard had charge
of Mrs. Hicks' store during the
absence of the latter over a
week end.According to reports southern
Alberta will produce more than
87,000,000 bushels of wheat
this fall.Mr. George Thompson of th-
century Glass Co. office staff,
turned at the week end from a
visit at the Coast and U.S.A.
points.Mr. R. Moore was taken to the
Medicine Hat hospital on Thurs-
day where he was operated upon
for appendicitis. He is now
progressing favorably.Miss Lillian Leaning who has
been holidaying at the Collard
cottage at Elkwater for the past
three weeks, returned to her
home here on Saturday.The Mines Hotel was host-
esses at a pleasant "miscellaneous"
howler on Saturday afternoon in
honor of Miss Laverne Benjamin,
an August bride elect.Mrs. J. R. Mackenzie was a
visiting hostess on Friday even-
ing in honor of Miss Nellie
Huckvale of Palo Alto, Cal., who
has been visiting with relatives
in Medicine Hat recently.Mr. Jack Learmonth, who has
been attending Tech School in
Calgary, arrived in town Sunday
evening to spend a few days' holi-
days with his parents. Jack was
successful in passing all his ex-
aminations and is, standing con-
gratulation from his friends here.Rev. H. S. Hockett, not to be
outdone by His Worship, Mayor
Sangster, in the matter of rais-
ing giant tomatoes, brought a
nice one into the Review Office
on Friday, that tipped the scale
at 16 ounces. We are therefore
forced to concede that His
Reverence and His Worship are
the CHAMPION tomato growers
in Redcliff this season. Any
one dispute this concession?The Baby Clinic will be held on
August 31st.
September 14th, and 28th.
October 12 and 26
Cut out this notice and save it
for reference.The Miller Jean and Myrtle
family are returning this week
end from Edmonton where they
have been visiting with relatives
for the past few weeks.The St. Ambrose parishioners
held their annual picnic at Cherry
Grove last Sunday. Even 8000
was held in the home of Mr. and
Mrs. Fred Smith owing to the
inclemency of the weather.A lady in town had a pair of
fine barred rock chicken which
she wanted to keep for breeding
but one of them was stolen from
her hen house. She says now to
come on and get the other one.A heavy wind storm blew over
town last Sunday evening and
several windows were blown in.
Many of the apple trees were
stripped of their abundant yield.
This will doubtless mean fewer
tummy aches for the small boys
and some larger ones. It's an ill
wind that blows nobody good.Mrs. Chancy Benjamin was the
hostess at a miscellaneous shower
held at her home on Friday
afternoon in honor of Miss
Laverne Benjamin who is to be
married at the end of the month.
Games were played and a pleas-
ant social hour was spent, after
which dainty refreshments were
served.Mrs. Hicks returned Tuesday
from a few days' visit with her
daughter, Mrs. Mac Mallard and
Mr. Mallard at Red Deer. Mrs.
Hicks' grandchild, Don, who has
been visiting her for the past few
weeks returned with her to his
home in Red Deer. Mrs. Hicks
visited at Calgary and Banff
before returning home.**APPLICANTS WANTED**We have fine localities open
around Hanna, Youngstown,
Pellyville, Corston, Monitor,
Open, Big Valley. Applicants
must be well, reliable and hard
workers and have car or suitable
travel outfit. An opportunity
to get established in your own
business. For particulars re-
garding other localities apply to
